Funded by
the European Union

How can clinical trial data sharing become an integral part of trustworthy, reproducible and impactful research?

Join researchers, patients, policy-makers, regulators, funders, journals, research infrastructures and industry representatives for the final SHARE-CTD conference.

Day 1

Enabling Clinical Trial Data Sharing

Governance · FAIR data · Privacy · Regulation · Infrastructure

Over two days, we will discuss how responsible sharing and re-use of clinical trial data can:

- strengthen reproducibility and research integrity,
- enable innovative secondary research,
- improve evidence generation, support better healthcare decisions, and
- maximise scientific and societal impact.

Day 2

From Shared Data to Better Evidence and Better Outcomes

Re-analysis · Secondary use · Reproducibility · Innovation · Impact

Call for contributions

Submission deadline February 2027

Registration and full programme

Further details will follow.
